Welcome

Express Settings

# Welcome to Azure AD Connect

**Run this installation tool on the server where the synchronization service component will be installed.**

Azure Active Directory Connect integrates your on-premises and online directories.

This installation tool will:

- Guide you in selecting a solution (for example, password hash synchronization or federation with AD FS)
- Install identity synchronization and other Microsoft software components required for deployment
- Enable application telemetry and component health data by default. You can change what data is shared with Microsoft by updating your [privacy settings](#).

[Learn more about hybrid identity](#)

☐ I agree to the [license terms](#) and [privacy notice](#).

Welcome

Express Settings

## Express Settings

If you have a **single** Windows Server Active Directory forest, we will do the following:

- Configure synchronization of identities in the current AD forest of VIJAYARCHITECT
- Configure password hash synchronization from on-premises AD to Azure AD
- Start an initial synchronization
- Synchronize all attributes
- Enable Auto Upgrade

[Learn more about express settings](#)

Select Customize to choose advanced deployment options or import settings from an existing server.
